

GroundCloud's 4K VEDR system takes vehicle and driver protection to the next level. The dual lens system provides 4K video from the front-facing lens while simultaneously capturing the cabin in wide angle 1080p. Keep your fleet safe and compliant with the best tech at the best value.

### Live and On-Demand Video Footage

Watch drivers live through your GroundCloud management portal, or request footage for a specific incident. No need to remove the device or waste time scrolling through raw footage.

### Automated Captive Coaching

Automated captive coaching means you don't need to hound drivers to complete their training. Helps fleet managers identify and eliminate risky driving behavior which helps prevent future incidents.

### Encourage Positive Driver Behavior

Automatic backing & residential driveway incursion detection, and targeted coaching aids in driver development.

### Simplify Claims Verification

Always on recording aids in rapid resolution of false accident or delivery claims.
