

# GROUND CLOUD PAYROLL

GroundCloud Payroll, powered by Gusto, is the best way for a delivery business to pay your team. Our payroll payment solution is fully integrated with fleet management accounts so that shift time, stop counts, and time-off requests seamlessly come together for the most accurate, timely, and secure payments. This all-in-one model simplifies the payroll process while giving business owners and designated personnel increased visibility into the company's financials and employee compensation.

If you do payroll right, you have happy and motivated employees. If you don't, it might affect the team morale and draw the attention of the authorities. With 58% of all small businesses preparing their own payroll, and nearly half receiving payroll related fines, GroundCloud Payroll is poised to make a significant impact on our customers' operations.

## INTEGRATED SOLUTION

GroundCloud Payroll is embedded in our Pro fleet management platform and fully interconnected with timekeeping and delivery metrics, so compensation is calculated from live data within your account. Now Pro allows you not only to prepare data for payroll but to actually process payroll as well. Manage driver hours, total stops, create compensation structures, and do payroll in one place.

## ACCURATE & SECURE

Payroll is calculated from real driving hours and stop data managed within your fleet management account, limiting opportunity for error and ensuring full visibility into pay calculations. Being powered by payroll industry-leader Gusto, with a strong record of helping businesses meet regulatory requirements and avoid infractions, makes GroundCloud Payroll a solution you can trust.

## SAVE TIME & MONEY

No need to transfer time-tracking information between services, perform complicated calculations, or pay for outsourced payroll. Automated processes deliver the most accurate payroll efficiently while avoiding regulatory fines.

## TRUSTED SUPPORT

GroundCloud Support operates 7 days a week to help keep your business moving. Our US-based team is available by call, email, and support ticket to quickly resolve any issues or answer questions related to your account. The delivery world can move quickly, and we are here to help when you need it.

## ABOUT DESCARTES GROUND CLOUD

GroundCloud is a leading SaaS-based logistics software company that delivers best-in-class safety, operations, telematics, and analytics solutions for the final mile delivery industry.
