

# Descartes Safety Platform

Mobile-based driver training that reduces time out of field for training and keeps your CDL fleet trained and safety compliant.

Accidents on the road can be costly and detrimental to productivity and fleet reputation. Often resulting from a lack of professional driver training, these incidents can be addressed proactively by identifying and correcting unsafe driving behaviors. Proactive Safety Training from Descartes-GroundCloud helps fleets mitigate these risks while maintaining driver productivity.

95%+ driver safety compliance	50% reduction in unsafe driving events	11% reduction in claims
An automated training schedule sent to drivers' mobile devices for effortless safety compliance.	Targeted training modules proven to reduce the number of unsafe driving events, like distracted driving and seatbelt usage.	GroundCloud Safety customers had an average 11% reduction claims.

## PROACTIVE SAFETY TRAINING

Keep safety top of mind with an automated monthly safety schedule covering professional driving topics and parking techniques. Our training modules are designed in-house by industry veterans to help drivers stay compliant and develop a culture of safety within your team.

## SUPPLEMENTAL SAFETY TRAINING

Customize your training schedule based on the needs of your team. Our library contains modules on a wide variety of safe driving topics that allow you to react to safety concerns and address them.

## FLEET-WIDE SAFETY MONITORING

Make sure your team is up to date and compliant with instant proof of your team's training record and signed confirmation of completion. Drivers are given scorecards rating their overall safety and making it easy to identify areas for improvement.

### Solution Area(s)

Routing, Mobile & Telematics

### About the Product

The platform seamlessly automates and integrates microlearning safety training into a driver's routine, fostering a robust safety culture across the entire fleet. This comprehensive solution ensures training completion, tracks comprehension, and empowers organizations to prioritize safety.

## KEY CAPABILITES

- Mobile-based driver training minimizes field downtime.
- Automated scheduling ensures prompt execution of the training program regimen.
- Testing helps enforce driver training and comprehension.
- Reporting keeps management informed of driver training status.
- Record of training program activity serve as evidence for litigation or regulatory reviews.
